From the LiquidSpin Editor

1. This literary creation has led to an essential misconception.

   For Hippocrates, even if food was closely linked to health and disease, the concept of food was not confused with that of medication. Carneside D. Let not thy food be confused with thy medicine: The Hippocratic misquotation. Clinical Nutrition. n.s.PRN:2013;8(6):e260-e262. http://dx.doi.org/10.1016/j.
